● Opfindsomheden trives hos Danisco i Brabrand

Danisco er en af verdens førende producenter af ingredienser til fødevarer og andre forbrugerprodukter.

Danisco har udviklingsfaciliteter i 18 lande, hvor cirka 1.000 medarbejdere er beskæftiget med innovation. I Brabrand ligger koncernens største enhed inden for dette felt. Halvdelen af de cirka 500 ansatte i Brabrand arbejder med innovation.

På de mange test-faciliteter og laboratorier i Brabrand udvikles løsninger til fødevarerhvervet verden over. Afdelingens eksistensberettigelse er at være innovativ – at spotte de nye trends og omsætte dem til løsninger, der kan indgå i kundernes produkter. På den måde er Danisco med til at dække den internationale forbrugers fremtidige efterspørgsel af sunde, velsmagende og sikre fødevarer.

Daniscos udvikler og producerer blandt andet emulgatorer, enzymer, stabilisatorer, kulturer,

aromaer, sukker og sødemidler. Produkterne bruges eksempelvis til at forbedre konsistensen i brød eller is, men anvendes også inden for foder, vaskemidler, tekstiler og plast. De fleste ingredienser fremstilles på basis af naturlige råvarer – blandt andet planteolier, tangplanter og citrusfrugter.

Danisco omsatte for 17,8 mia. kr. i 2004/05. Koncernen har godt 10.000 ansatte i mere end 40 lande.

● Innovation is thriving at Danisco in Brabrand

Danisco is one of the world's leading producers of food ingredients and other consumer products.

The company has development facilities in eighteen countries where approx. 1,000 employees are engaged in innovation. The group's largest innovation unit is in Brabrand, a suburb of Aarhus, where about half of the 500 employees are involved in innovation activities.

At the many test facilities and laboratories in Brabrand, solutions are developed for food companies worldwide. The department is about being innovative – spotting new trends and translating them into solutions which can be used in Danisco's customers' products. In this way, Danisco helps meet international consumers' future demand for healthy, tasty and safe food products.

Products developed and produced by Danisco include emulsifiers, enzymes, stabilisers, cultures, flavours, sugars and sweeteners. The products are, for example, used to improve the consistency of bread or ice cream, but are also used within animal nutrition, detergents, textiles and plastics. Most ingredients are based on natural raw materials, including vegetable oils, seaweed and citrus fruit.

Danisco recorded revenue of DKK 17.8 billion in 2004/05. The group has just over 10,000 employees in more than 40 countries.
